The following gentlemen have been appointon ochalf of the government, trustees for ensuing year. John Dent, Esq:

Wilberforce Wilson, Esq. C. C. Smith, Esq. John Simpson, Esq. G. Bird Esq. is appointed government anitor. The seat-holders have elected as truses for the ensuing year, - . Francis Parry, Esq. and R. S. Walker, Esq.

nd as auditor W. C. Hunter Esa. The San Francisco Steamers. A correspondent of a San Francisco paper ie Beening Bulletia, in giving an account o trip to New York via Panama, refers as llows to the intended line of steamers be-

ween China and California:-There was a rumor correct in California when: re left, that the Pacific Mail Steamship Company, hich has the contract for steam mail service to ps and China, would anticipate the time fixed Congress for the beginning of said serviceannary let, 1867—and begin during the spring f the present year. Inquiry at the office of the ompany here does not confirm this rumor. te propriety of anticipating the time as stated as been considered, but it is not probable at the Asiatic ateamships will commence inning before next year. Meanwhile two ignificent steamers, Inrger than any heretoore constructed in the United States, are now ing bulls for the new service in this city. key will have a burthen of 4 500 tons. Gavern. at measure, and be built extra strong, double anked and iron-braced. The Colorado will probabe strengthened and adapted for the lame rvice. Apart form the capacity that it is premed will be required to meet the expected ight basiness between California and Asia, sace will be needed for atoring a large amount of al, as there will be no coaling station within aat 5 000 miles. The steamers will sail on what terme : the grand circle from San Francisco to anagawa, with probably a branch service to the andwich islands. Very likely, the monthly seres to Japan and Chi is will it maderate freights e charged, shou be increased to a semi-monthly rvice. What port will be made in China has t yet been concluded and will not be until the turn of the Company's agent, who is new visitr San Francisco, Japan and China, to examine d report. In this connection the Company-has een advised of the desirability of Shanghao as terminus of the route. This shout 700 mile carer than Hongkong, and is the great central rt of the China, into which pours the Yangtzeing. This river is navigable for steamers out 800 miles. It is about 60 miles wide for a naiderable distance, and flows through fertile

levs and by populous cities that offer to Amocan enterprize a bampting opportunity. It is estined to become the centre of American curorize in China, Hongkong is simply an Engi port, where we would have to struggle with ier disavantages besides English competition rangbai offers every facility for renaiting ships the shape of first-rate docks, etc. It in, benides e arleat terminus. Steamers that go there will oid the typhogns, which sweep over the south. s coast of China during the months of July, igust and November. Such arguments as these forcibly urged by American residents and mantar agents in China, and will probably have ach weight. Sagacity and liberality at the beoning will accure a great true with Uhina at an

the Berlin correspondent of the Farsenhalle tes that the King of Prussia will not go to St. terebury as announced, to be present at the ebration of the 25th anniversary of the Emor Alexander's marriage, but that the Royal use will be represented at that solembity by ince Charles and other Prussian prince. Mr. Hawking Horses.—We have this morig seen a fine draft of Horses shipped by Mr. G. Hawkins on board the Engineet Adde Hongkong. They are a splendid lot of well d Saddle and Harness Horses, and as they ve be in selected by Mr. Hawkins himself who s for some years a resident of Hongkong y will doubtless be throughly well enited for t morket. They are the best lot we have n leave Sydney for some time. — Sydney Herold. UNE COMPORT -At a Mofestil station, not very g ago, it was our furture to hear an individual aplain bitterly of the probable monotony conseent upon the approaching bot weather. " Breadindeed," said a lady present, " but we are sure have plenty of quarrels; that is one comfort." dras Alhen teuni.

Extracts. The Geology of California. California recently published affords some inter- Houses, Lands, Tenements, &c. esting extracts.

CINNABAR DEPOSITS. The only mine of cinnabar which has been extensively worked in the State, and with large profit, is that of New Almaden: indeed this mine is THE Promises recently occupied by Merers. Ray the second in importance in the world; it is only inferior in productiveness to the Almoden mine itself, the average monthly produce of quicksilver for the half year ending December 1864, being 4.118 flacks, or about 300:000 nounds, equal to 3,500,000 pounds per nanum. The present capacity of the reduction works is equal to a production of 5,000 flanks monthly, or 4,500,000 pounds per annum. With the New Almaden, the Enriquita Mine is now united, and the total production. of the two, since July, 1850, is given in the publighed statements of the company at 371.8 0 fleaks of which the Euriquita furnished 10.571 only. The ore from which the larger portion of this amount of metal has been taken occupied a series of irregular cuvities, mostly confined within a in Zetland Street. For particulars amply to space about 100 feet square and extending downwards for about 409 feet. This ore ground ding to the north at an angle of 30 deg. to 35 deg., with the formation, and the masses or chambers of ore are scattered through it without any appreach to regularity, 28 is shown by the fact that

there have been times when there was no ore in sight in the mine, in spite of its great average productiveness. The ore-ground extends for some five miles the northwest, in the line of strike of the strute. and has been opened and worked at interval, although no one locality has at all approached in productiveness the New Almaden bline itself. Mine Hill, was opened in 1859; but was closed and Servants Rooms. from May, 1861 to May, 1863; it has produced about 1,500,000 pounds of quicksilver, but has not been worked with profit, owing to the irregular distribution of the ere. The same is true of the Guadalupe Mine, two miles beyond the Enriquita, where, up to 1862, nearly \$500,000 had been ex- Storage by one whole Gadowe or by To the Bale pended in prospecting. Quicksilver is one of the important articles of export from California; a large portion of it (in 1864, just one half) goes to China, the remainder

nearly 2.500,000 pounds per annum. Considerable patches of the quickshiver-dearing rock occur in the hills around the mission, and both the native metal and the sulphurct (cinnout) have been found in small quantities but no workable deposit has yet been discovered The trouble with all the deposits of cinnabar just noticed is, that they are too irregular, and that the are is not sufficiently concentrated, or in arge enough masses. There is no reason why heavy deposits of ore should not be met with, insinking upon the outerons in which small quantiter of certainly; and, as the result of actual ex- Paner. periodice, it may be stated, that in the only instance i where a deposit of ore has been discovered rufficiently large to pay for continuous working, there was a correspondingly large display at the sur-

chiefly to Mexico and the South American States.

The average amount shipped from San Francisco

EXISTENCE OF PRINCLEUM. more fluid oil in connection with the solid asphal- | Offices or Chambers. tum, has led to unbounded hopes of a vast production of petroleum in the Coast Ranges of California, creating and excitement which has been skillfully made use of by unprincipled speculators, for their own purposes, by the creation of stock companies with an immense number of shares, which have been disposed of to a credulous public, nearly the whole proceeds of their sale being clear profit to the promoters of these enterprises, while it is create that, even under the most favorable conditions, the luckless stockholders will

money ingested. · Our line of exploration, through the asphaltum admirably suited for a Banking institution or large region in Santa Barbara and Los Angeles coun - Mercantile firm. ties did not happen to lend us to those ranches which have become celebrated by the formation of monster oil companies on them, although w , examined carefully all the localities where, at that time, the asphaltum was being made practically ITHE House in Wellington, Street, (formarly available; in none of these did it happen that more than a trace of a really fluid oil could be

quantity of the asphaltum of this region was for- For further particulars apply to. warded by us to an Eastern city, where it was examined by a highly skilful chemist, well sequainted wit this class of substances, to see if it or could be made available as a source of burning oil, under the present conditions. The answer to his question was in the negative, and subsequent trials, on the somewhat larger scale in Oalifornia, have confirmed this result. We consider it a settled question, that with the facilities and conditions which now exist, the auphaltum cannot be 1 profitably used for the manufacture of burning or having a two-storied detached Granite Godown. lubricating oil. It is not necessary, in this place to go into a detailed statement of facts to prove ! this; that may be more properly reserved for the volume of Economical Grology. Those who doubt the statement onn, if they see fit, devote their time. and money to proving it to be incorrect by actual-

practical results.

BORAK LAKE volcanio forces in this region, there is nothing more interesting and remarkable than the so-called "Borax Lake" and its vicinity. This lake ocupies Wyndham istruct. a depression on the east side of the narrow arm of Clear Lake, from which it is separated by a low ridge of volcanic, materials, lying loosely, heaped ti gettler, and consisting of scorice, obsidian, and millar Large Isolated Dwelling house known as pumice. The Borax Lake is of variable dimengione, according to the season of the year and the Rooms. Water laid on in the Bath Rooms; Kitchen comparative dryness of the season. When ex | Pantry and large Stables detatched at present nmined (September 1863) the water occuppied an occupied by Col. Jenner :- Possession can be had area of about 4 000 feet long, and 1,800 feet wide on the let February. in the widest place, and its shape was irregularly oval, its longer axis being turned in the direction of east and west, magnetic; it has once extended nearly twice on far to the southeast, and the ground is hardly raised above its present level in that G GRANITE GODOWNS on Marine Lot. No direction for nearly a mile. The lake is said to 2 745 at Wanchi, having Water frontage and have been entirely dry during the summer before about 25000 Picuis holding capacity for one or the great rains of 1861-62. In 1863 the water was two.

about three feet drep. The existence of the lake was first made known to the world by Dr J. A. Veatch, Who examined it in September 1856, and detected the presence of borax in its waters, but it was not till some months afterwards that the existence of a large bed of crys- and at present in the occupation of Messes tals of this valuable material in the botom of the | ELMENHORST and SANDER, lake was discovered. The land about here has been located by the " California Borax Company." the ageots of which have caused explorations to be made, have had the waters carefully unalyzed, and were in 1864, preparing to manufacture horax on a large scale.

The Big Trees are, indeed, among the greatest" wonders of California, and require no exaggeration to make them attractive. Full particulars in regard to their growth, habite and dimensions, will be given in the botanical volume of the Geological Report : it need only be added that the age of the tree which was out down in the Calsveras Grove, and which, at six feet above the ground, has a diameter of 23 feet inside the bark, THE No. 2 and No. 4 Two Storied Godowns was found to be about 1,300 years. It was easy to count the annual rings, and they amounted to 21 and 25, with Offices, Comprador and Ser-1.255 in number: but there being a small space, | vants Rooms, and Cookroom, having a Capacity about a foot in diamter, at the centre of the tree, of 2500 Tons each. from which the wood was decayed away, it would be a reasonable estimate to call the age of this particular tree 1,300 years. The difference in the rapidity of its growth, at different ages may be inferred from the fact that the width occupied by 100 rings at the centre of the true was 13 inches, and next to the bark was only three.

THE CREED OF THE AMATEUR ACTOR.—I believe in myself. I believe in nobedy clas. Actors have lived before me; actors will probably live after membered. I'am perfect, faultless beyond cri- and commanding the whole view of the harbor ticism. To suggest that I am not faultless is an and town, and delightfully situated behind the evidence of base mind. To bint that anyhody Albany Southward of Mr W. H. Alexander's rehas impersonated a character more successfully sidence. than I have, is equal to the commission of a crime, fam a living proof that an actor may passess boundless versatility. I have never fulled in anything I have attempted. I am equid to the whole range of dramatic creations from Hamlet to Harlequin. I consider myself the only capable intedprefer of Shakespeare, the only sufficient analyst of his meaning. I regard myself superior the Shakespeare, masmuch ha Shakespeare did not at [all times comprehend his own meaning; and as I fore, superior to him. I look upon an audience | 1 . 11, Vives, Esq., the Business; good will, stock as a crowd of worshippers, who, for the time, exist and fixtures of the proprietory known as the BBE Undersigned having been appointed Agentiof my company as existing only to set off, by solicits a share of public patromage. their littleness, my own transcendent greatness .--Melbourne Punch.
